

August 25, 2010

To Whom It May Concern:

The Fort Worth Fire Department purchased, and has been using two of the model 6 MU's for the past five years. Our dryers assume a work load of 12 hours per day, 4 days a week. Our PPE Technicians are pleased with the consistent performance, and being able to keep up with the work load.

I would recommend Ram Air Gear Dryers to any department that is looking for a quality gear dryer.

Sincerely,

Captain Michael Gardner
Supply Manager
PPE Coordinator
