

TURNOUT GEAR DRYERS

At Ram Air Gear Dryers, we understand the importance or clean, dry gear, but we also know that taking gear out of commission for cleaning is not always practical. Firefighters need to be ready for action—not delayed with wet gear. Ram Air Gear Dryers get you back to action in a fraction of the time! They safely and quickly dry all bunker gear and accessories including helmets, gloves, boots, face masks and SCBAs. Our dryers are available in 4- or 6-unit models with a touchscreen control that enables ambient- or heated-air drying. All models align with gear manufacturer requirements and comply with NFPA 1851/FEMSA recommendations for drying gear.

TARGETED DRYING

It comes down to power. Ram Air's patented design uses powerful fans that push air through gear from the inside out—effectively drying the hard-to-reach areas and vapor barriers that are prone to mold and mildew if not dried properly. The unique design of our gear dryers limits air loss and prevents air flow from following the path of least resistance. The result? Faster, more efficient drying and an increased ability to dry more suits in the same amount of time.

FLEXIBILITY FOR ALL GEAR COMPONENTS

As a firefighter-owned company, we know what it is like to work in wet boots and gloves. That is why Ram Air Gear Dryers come fully loaded with up to 18 component ports for drying all accessories including helmets, gloves, boots, face masks and SCBAs.

USER-FRIENDLY CONTROL

Ram Air Gear Dryers feature touch screen controls that gives departments the ability to easily toggle between ambient- or optional heated-air drying. When the dryer is in use, the touch screen clearly displays the drying status and dry time remaining. For ease of use, the control features five dry time presets including a continuous drying option. An additional custom timer button enables users to program a custom dry time based on their department's unique drying needs. For departments needing a more economical option, Ram Air offers a basic timer control in lieu of the touch screen.

STRUCTURALLY-SUPERIOR CONSTRUCTION

We strive to deliver products that set quality standards beyond any other competitor's products. Heavy-duty casters provide mobility while top-quality steel construction of the frame and air passages ensure that Ram Air Gear Dryers are built to last. We design our dryers to be the most structurally-superior gear dryers available and stand by them with a full three-year guarantee!

REMOVABLE BLOWER FOR DRYING PUMPER TRUCK PORTS

Making efficient use of your dollar is important. That is why the fans on our gear dryers do double-duty. Not only do they provide efficient drying of your gear, they can be easily removed and attached to your pumper truck's water ports for quick drying—preventing freeze-ups in harsh winter conditions thereby protecting your apparatus investment.

Special-Ops Gear Dryer
Four Drying Units; 12 Accessory Ports; Invertible Stickmen

Model #T4!HT

Special-Ops Gear Dryer with ADT-14 Accessory Drying Tree
Four Drying Units; 12 Accessory Ports; Invertible Stickmen

Model #T4H-T and #ADT-14

Special-Ops Gear Dryer with BD-8 Boot Accessory Four Drying Units; 12 Accessory Ports; Invertible Stickmen Model #T4-IHT and #BD-8

SPECIAL-OPS GEAR DRYERS

By allowing for inverted drying, Ram Air's Special-Ops Gear Dryers are able to dry hazmat, immersion and ice-rescue suits that standard gear dryers cannot accommodate while still drying standard bunker gear and accessories. Adjustable to any size gear, the T4-IHT dries quickly and efficiently without turning gear inside out and causing damage to the gear. It also aligns with gear manufacturer requirements and complies with NFPA 1851/FEMSA gear drying recommendations.

ADIUSTABLE FOR ANY SIZE GEAR

Gear designed for special emergencies can be large and awkward to handle. Ram Air Special-Ops Gear Dryers can accommodate the unique sizes of hazmat, immersion and ice-rescue suits easily. Each of the machine's four drying positions features adjustable height stickmen that can be shortened or extended based on the size of the garment.

TOUCH SCREEN CONTROL

Ram Air Gear Dryers feature a touch screen control that clearly displays the drying status and dry time remaining. The control features five dry time presets including a continuous drying option. An additional custom timer button enables users to program a custom dry time based on their department's unique drying needs.

KEEPING YOU DRY FROM HEAD TO TOE

Working in dry boots, gloves, face masks and SCBA's makes doing your job safer and more comfortable. Ram Air Special-Ops Gear Dryers feature 12 ports for quick drying all gear accessories.

QUALITY CONSTRUCTION YOU CAN COUNT ON

Providing top-quality products is our top priority. Heavy-duty casters provide mobility for the unit while top-quality steel construction of the frame and air passages ensure that Ram Air Gear Dryers are built to last. We don't just stand by our products, we guarantee them for a full three years!

SPECIAL-OPS GEAR DRYER ACCESSORIES*

BD-8 BOOT DRYING ACCESSORY

The BD-8 boot drying accessory properly removes the moisture in boots that can cause mold and mildew. The accessory fits easily into any one of the four drying ports enabling departments to dry a large number of boots simultaneously after emergency or training situations. The BD-8 allows for eight boots per accessory or up to 32 boots using multiple accessories.

ADT-14 ACCESSORY DRYING TREE

Like the BD-8, the ADT-14 accessory drying tree fits into any one of the Special-Ops Gear Dryer's four drying ports for the proper drying of boots, station footwear and gloves. Because the ADT-14 features slightly shorter arms than the BD-8, it allows for drying of up to 14 items per accessory or up to 56 items using multiple accessories.

* Accessories are optional and are not included with the dry

Rinse Station/Staging Accessory

Model #RSB

Disinfection Sprayer

Model #Decon-1

RINSE STATION/STAGING ACCESSORY

The Ram Air Rinse Station and Staging Accessory securely holds stickmen from the gear dryer in an upright position for easily rinsing/decontaminating gear that cannot be washed in a mechanical washer. After cleaning, the dressed stickman are easily transferred to the gear dryer without further handling of the gear. The Rinse Station can be ordered as a base only or as a base/stickman package. Additional stickmen can also be ordered separately.

QUALITY CONSTRUCTION

The Rinse Station and Staging Accessory is constructed of steel and coated with durable powder coat paint to eliminate scratching and corrosion resistance. It features Teflon® sliders for easy set-up and storage and rubber bumper feet for added traction on floors.

STAGINO

When not in use for rinsing gear, this accessory can be used to stage gear when gear drying needs exceed the capacity of the gear dryer.

COMPACT DESIGN

The Rinse Station and Staging Accessory is designed to be compact. It's open dimensions are $36.5'' \times 46.25'' \times 7.5''$ and it folds easily for convenient storage when not in use.

DISINFECTION SPRAYER

The Ram Air Gear Decon Sprayer properly cleans/disinfects hazmat, immersion and ice-rescue suits that cannot be washed in a mechanical washer.

AIR INJECTION

Designed with air injection at the nozzle, the sprayer automatically mixes water and gear-cleaning solutions/disinfectants* with air to achieve a foaming action. The foam provides better adhesion to the garment—ensuring saturation time requirements set forth by manufacturers are met and that gear is properly decontaminated.

360-DEGREE SPRAYING

With an extra-long spraying wand and 360-degree spraying, the Ram Air Gear Decon Sprayer allows for spraying in any direction—even upside-down—so hard-to-reach areas of the gear are properly cleaned. The sprayer operates with water pressure of up to 100psi, so it can easily be connected to a standard 3/4" garden hose.

ONE- OR TWO-JUG OPTION

A dual-jug model is available for departments that prefer a jug for cleaning solutions and a jug for disinfectants on the same unit. This eliminates the need to manually remove and replace cleaning/disinfection jugs. A simple toggle switch on the sprayer switches jugs.

IRE HOSE ADAPTER

A fire hose adapter is available so the sprayer can be directly connected to a fire or pumper truck—making decontamination of the sidewalk or street following an incident easy.

^{*} Cleaning solutions and disinfectants sold separately.
