

ACCESSORIES FOR T4-IHT GEAR DRYER

BD-8 BOOT DRYING ACCESSORY

The BD-8 boot drying accessory properly removes the moisture in boots that can cause mold and mildew. The accessory fits easily into any one of the four drying ports enabling departments to dry a large number of boots simultaneously after emergency or training situations. The BD-8 allows for eight boots per accessory or up to 32 boots using multiple accessories.

FEATURES

- Solid steel construction
- Powder coat paint
- 8 reversible boot holders
- Dimensions: 83" x 31"

ADT-14 ACCESSORY DRYING TREE

Like the BD-8, the ADT-14 accessory drying tree fits into any one of the T4-IHT's four drying ports for the proper drying of boots, station footwear and gloves. Because the ADT-14 features slightly shorter arms than the BD-8, it allows for drying of up to 14 items per accessory or up to 56 items using multiple accessories.

FEATURES

- Solid steel construction
- Powder coat paint
- 14 reversible boot/accessory holders
- Dimensions: 83" x 31"
